1. 01: Smart Health (SH) and Biomedical (BM) Technologies

Release Date: 11-11-2015Open Date: 11-11-2015Due Date: 12-11-2015Close Date: 12-11-2015

Smart Health (SH)The need for a significant healthcare transformation has been recognized by numerous organizations, including the President's Council of Advisors on Science and Technology (PCAST), National Research Council (NRC), Institute of Medicine (IOM), Computing Community Consortium (CCC), the National Academy of Engineering and the Office of the National Coordinator for Health Information ...

STTR National Science Foundation

2. 02: Biological Technologies (BT)

Release Date: 11-11-2015Open Date: 11-11-2015Due Date: 12-11-2015Close Date: 12-11-2015

BT1. Agricultural and Food Safety BiotechnologyNew approaches for meeting the world's future nutritional needs. For Agricultural Biotechnology, target areas for improvement may include (but are not limited to) drought tolerance, improved nutritional value, enhanced disease resistance, and higher yield. Proposers should use biotechnology in their approach, and should give consideration to technolog ...

3. 03: Chemical and Environmental Technologies (CT)

Release Date: 11-11-2015Open Date: 11-11-2015Due Date: 12-11-2015Close Date:
12-11-2015

The Chemical and Environmental Technologies (CT) topic covers a wide range of technology areas of current and emerging commercial significance pertaining to the broad chemical industry, the environment and related industrial sectors. Phase I proposals would typically be at the proof of concept/technical feasibility stage on new or novel technology concepts and innovations when submitting to this o ...

STTR National Science Foundation

4. 04: Educational Technologies and Applications (EA)

Release Date: 11-11-2015Open Date: 11-11-2015Due Date: 12-11-2015Close Date:
12-11-2015

Administrative InformationSubmitted proposals for education applications should provide detailed descriptions of how the proposed application will work and provide examples of how users would interact with the application and how learning takes place. Projects that propose technologies or products similar to those in the marketplace or those similar to existing products and processes must make the ...

STTR National Science Foundation

5. 05: Electronic Hardware, Robotics and Wireless Technologies (EW)

Release Date: 11-11-2015Open Date: 11-11-2015Due Date: 12-11-2015Close Date:
12-11-2015

Sensors (SE)Recent technological advancements in materials science and bioengineered systems have made inexpensive, powerful, and ubiquitous sensing a reality. Examples range from truly smart airframes and self-evaluating buildings and infrastructure for natural hazard mitigation to large-scale weather forecasting, self-organizing energy systems, and smart devices that self-assemble into networks ...

STTR National Science Foundation

6. 06: Internet of Things (I)

Release Date: 11-11-2015Open Date: 11-11-2015Due Date: 12-11-2015Close Date:
12-11-2015

The Internet of Things (IoT) is a rapidly evolving field that involves the interconnection and interaction of smart objects (objects or devices with embedded sensors, onboard data processing capability, and a means of communication) to provide automated services that would otherwise not be possible. IoT is not a single technology, but rather involves the convergence of sensor, information, communi ...

7. 07: Information Technologies (IT)

Release Date: 11-11-2015Open Date: 11-11-2015Due Date: 12-11-2015Close Date:
12-11-2015

IntroductionInformation technology is increasingly impacting almost every aspect of our
lives, from communicating with friends and family to manufacturing of the products that we
use, the efficient supply of food, the provision of healthcare services, and the performance of
financial markets and our nation's economy.The past decade has seen explosive growth in
the generation of data and the creati ...

STTR National Science Foundation

8. 08: Semiconductors (S) and Photonic (PH) Devices and Materials

Release Date: 11-11-2015Open Date: 11-11-2015Due Date: 12-11-2015Close Date:
12-11-2015

Photonics (PH)The Photonics topic addresses the research and development of new
materials, devices, components, and systems that have the potential for revolutionary
change in the optics and photonics industries. Proposals should be motivated by market
opportunity, a compelling value proposition, clearly identified end users and customers of the
proposed technology, and a viable pathway to commerc ...

STTR National Science Foundation

9. 09: Advanced Materials and Instrumentation (MI)

Release Date: 11-11-2015Open Date: 11-11-2015Due Date: 12-11-2015Close Date:
12-11-2015

IntroductionThe Advanced Materials and Instrumentation (MI) topic addresses the
development of new and improved materials and instruments for a wide variety of
commercial and industrial applications. Proposals in Advanced Materials may focus on the
creation of innovative material systems and/or on critical fabrication, processing, or
manufacturing challenges involved in the successful commercializ ...

STTR National Science Foundation

10. 10: Advanced Manufacturing & Nanotechnology (MN)

Release Date: 11-11-2015Open Date: 11-11-2015Due Date: 12-11-2015Close Date:
12-11-2015

Advanced Manufacturing (M)The Advanced Manufacturing (MN) subtopic aims to support all
current and emerging aspects of manufacturing innovations that have the potential to
rejuvenate the nation's manufacturing sector and also improve its efficiency,
competitiveness, and sustainability. Proposals should be driven by societal/market needs and
opportunities, and should identify both the end users of ...
